

# HOUSE & GARDEN REPORT AQUA FLAKES A & B

## A&B AQUA FLAKES

House&Garden A&B Aqua Flakes. The complete base nutrient for Quantigo, Mapito, Rockwool, Coco en Flakes is especially suited for circulation systems. With the smart addition and composition of these nutrients, the nutrient water stays fresh and pure. At the same time, the excellently balanced nutrients ensure an optimal nutrient absorption by the plant at every nutrient feed.

## PRODUCT INFORMATION

H&G A&B Aqua Flakes Base Nutrient is composed of liquid main and trace elements and contains no bulking agents like solid fertilizers. H&G A&B Aqua Flakes is composed of the purest high-quality nutrients that are available on the market, including Eddha-Fe (iron). This way, you enable the plant to absorb the nutrients fast and effectively. So, in short: if you want an excellent start for your plants, House&Garden A&B Aqua Flakes is an excellent solution.

## APPLICATION

When preparing the nutrient container, fill it for two-thirds with water. First add A; circulate well. Then add B; circulate well. Adjust the EC-value - start of the growth (1.2) increasing schedule end of bloom phase (2.0). Harmonise the pH-value nutrient with pH-(Down) or pH+(Up). Top up the container with water. Add any root, growth or flowering stimulators. Your nutrient container is ready for a first watering.

## ABOUT HOUSE&GARDEN

House&Garden disposes of its own fertilizer plant, which offers many advantages. The production process can be checked from start to finish.

The benefit for you is that we can guarantee:

- the use of high-quality components at all times;
- constant nutrient values at all times;
- immediate product delivery at all times.

So, in short: quality, stability and continuity for your garden.

## ADVANTAGES OF AQUA FLAKES NUTRIENT A&B

- A&B Aqua Flakes is composed of liquid elements (no bulking or binding agents).
- A&B Aqua Flakes uses the best nutrient components in the purest form that is available on the market.
- A&B Aqua Flakes has a constant high quality.
- A&B Aqua Flakes is packaged in a light-proof packaging to ensure its quality.
- A&B Aqua Flakes has a sealed lid to guarantee that the product stays fresh.
- A&B Aqua Flakes is easy to use.
- A&B Aqua Flakes is very pure and ensures clean piping.
- A&B Aqua Flakes is highly concentrated and therefore very economical to use.

## ADVICE

Water the flakes before planting and keep them well-moisturised until the slip has formed roots. Consequently, keep the flakes a little dryer so that the slip's roots need to 'work' to find nutrients and water (preventing the plants from becoming 'lazy').

## WARNING

**Do not add A&B at the same time**, this triggers a chemical reaction in the nutrient resulting in sediment, incomplete nourishment and clogged piping.

**Never use an oxygen pump** in the nutrient container or on the growth table. This may have serious consequences for the stability of the nutrients (pH- and EC-values).

**ENSURE THAT YOUR EC- AND PH-GAUGE IS WELL-CALIBRATED WHEN PREPARING THE NUTRIENTS.**

**ASK YOUR OUTLET OWNER FOR OUR PRACTICAL SUCCESS SCHEDULE!**
