

# HOUSE & GARDEN REPORT DRIP CLEAN

## DRIP CLEAN

House&Garden Drip Clean is an extremely useful agent for anyone working with a drip system. Drip Clean works as a magnet, removing dirt particles at every nutrient feeding so that the piping remains clean. Drip Clean furthermore gives plants a boost, improving their greenness and vitality.

## PRODUCT INFORMATION

Drip Clean is a 100% safe agent for your plants provided it is used in the right proportion. Drip Clean contains potassium and phosphorus compounds, two very powerful and useful elements in the nutritional plan of the plant. These concern engineered compounds; one particle has been removed from their structure. The incomplete element thus works as a magnet. As molecules always seek a complete structure, Drip Clean attracts dirt particles with every nutrient feeding keeping the drip system clean. Drip Clean never fails and is a very effective agent against clogged drip systems and piping.

## APPLICATION

Drip Clean can be added to the nutrient container during the entire growth. A very small amount of Drip Clean will ensure that your drip system stays clean and much less prone to clogging. Prepare your nutrient container as follows: First add the base nutrient to your container (e.g.: Soil A&B, A&B Hydro, Coco A&B). Adjust the EC- and pH-value of the nutrient container. Finally add Drip Clean.

Your nutrient container is ready for a first watering.

## ABOUT HOUSE&GARDEN

House&Garden disposes of its own fertilizer plant, which offers many advantages. The production process can be checked from start to finish.

The benefit for you is that we can guarantee:

- the use of high-quality components at all times;
- constant nutrient values at all times;
- immediate product delivery at all times.

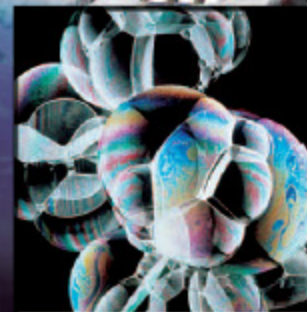

So, in short: quality, stability and continuity for your garden.

## ADVANTAGES OF DRIP CLEAN DETERGENT

- Drip Clean is a powerful detergent for your drip system.
- Drip Clean uses the best nutrient components in the purest form that is available on the market.
- Drip Clean has a constant high quality.
- Drip Clean is packaged in a light-proof packaging ensuring its quality.
- Drip Clean has a sealed lid to guarantee that the product stays fresh.
- Drip Clean is easy to use.
- Drip Clean is highly concentrated and therefore very economical to use.

## ADVICE

Use Drip Clean from the start of the growth to prevent clogging of your drip system. An additional benefit is that Drip Clean gives your plants an extra boost as it contains processed nutrients. This is reflected in the colour of the leaves (greener) and the firmness of the plants.

## WHEN TO APPLY DRIP CLEAN

- From the start of the growth at every nutrient feeding to prevent clogging of the drip system.

## WARNING

Drip Clean is a preventive agent and should be added from the first day of the growth. Drip Clean will not work with drip systems that are already clogged.

**Never use an oxygen pump** in the nutrient container or on the growth table. This may have serious consequences for the stability of the nutrients (pH- and EC-values).

## EU DOSAGE

### NUTRIENT READY FOR USE

Dosage Diagram of Drip Clean detergent

1 ML	for	10 Litre
5 ML	for	50 Litres
10 ML	for	100 Litres
100 ML	for	1000 Litres
