

HOUSE & GARDEN REPORT MULTI ENZYM

MULTI ENZYM

House&Garden Multi Enzym Is an extremely useful growth stimulator. Multi Enzym accelerates and simplifies the growth process and strengthens the plant's immunity. The enzymes convert the nutrient into ready-to-use bits making it easy to assimilate by the plant.

PRODUCT INFORMATION

H&G Multi Enzym is a collective term for a wide range of useful enzymes, which are very important for plant processes and processes in the plant environment. They are small catalysts that trigger these processes and keep them running. There are enzymes that help to convert the plant's nutrients, others strengthen its immune system, and even others help to dispose off residuals in the substrate. In short, a very important element for a successful growth with a great turnover.

APPLICATION

Use Multi Enzym during the growth period of the growth. Prepare your nutrient container as follows: First add the base nutrient to your container (e.g.: Soil A&B, A&B Hydro, Coco A&B). Adjust the EC- and pH-value of the nutrient container. Finally, add Multi Enzym. Your nutrient container is ready for a first watering.

ABOUT HOUSE&GARDEN

House&Garden disposes of its own fertilizer plant, which offers many advantages. The production process can be checked from start to finish.

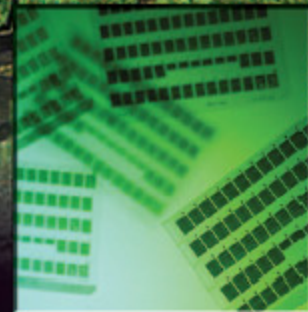

The benefit for you is that we can guarantee:

- the use of high-quality components at all times;
- constant nutrient values at all times;
- immediate product delivery at all times.

So, in short: quality, stability and continuity for your garden.

ADVANTAGES OF H&G MULTI ENZYM GROWTH STIMULATOR

- Multi Enzym is an extremely powerful growth stimulator.
- Multi Enzym uses the best nutrient components in the purest form that is available on the market.
- Multi Enzym has a constant high quality.
- Multi Enzym is packaged in a light-proof packaging to ensure its quality.
- Multi Enzym has a sealed lid to guarantee that the product stays fresh.
- Multi Enzym is easy to use.
- Multi Enzym is very pure ensuring clean piping.
- Multi Enzym is highly concentrated and therefore very economical to use..

ADVICE

Start adding Multi Enzym some two weeks after planting your slips.

This is the period in which the plant has to strengthen its immunity and absorption capacity to become a strong and healthy plant.

WARNING

Never use an oxygen pump in the nutrient container or on the growth table. This may have serious consequences for the stability of the nutrients (pH- and EC-values).

EU DOSAGE NUTRIENT READY FOR USE

Dosage Diagram of Multi Enzym growth stimulator

1 ML	for	1 Litre
10 ML	for	10 Litres
100 ML	for	100 Litres
1 L	for	1000 Litres

US DOSAGE NUTRIENT READY FOR USE

Dosage Diagram of Bud-XL flowering stimulator

3.8 ML	per	1 Gallon (3.78 L)
19 ML	per	5 Gallons (18.9 L)
95 ML	per	25 Gallons (94.5 L)
380 ML	per	100 Gallons (378 L)
